

Flexibility is our strength

Gemini technology have been Designing and Manufacturing turn-key prototype machines to suit the needs of our customers for 25 years. We can offer Mechanical Design, Electrical Design, Software design, Manufacture, Installation and Servicing.

Mechanical Design

- Prototype Machinery design.
- Safety Enclosure design.
- Sample handling system design.
- Radiological Protection design.
- Research & Development.
- 3d CAD Modelling.

Software Design

- Turn-key systems.
- Bespoke software designed by GEMINI software engineers.
- Software upgrades to existing 3rd party systems.
- Complex control algorithms.
- PLC integration.

Manufacture & Assembly

- Highly skilled & experienced workforce.
- Experienced in a wide range of unusual materials
- Manufacture all parts in our UK factory in Reading.
- Keeps control of quality and delivery times.
- Assembly & testing all performed in house.
- High customer retention & satisfaction.
- Extremely competitive manufacturing costs.
- Engineers who care.

Flexibility is our strength

Gemini technology have been Designing and Manufacturing turn-key prototype machines to suit the needs of our customers for 25 years. We can offer Mechanical Design, Electrical Design, Software design, Manufacture, Installation and Servicing.

Installation & Commissioning

- On site installation & commissioning worldwide.
- FAT & SAT Documentation written.
- Team of experienced engineers available.
- Project management ensures timescales are met.

Service & Maintenance

- Service contracts to GEMINI supplied systems.
- Call-out contracts to GEMINI supplied systems.
- Various levels of cover offered.
- 24 hour Reponses available
- 3rd party Systems also fully supported POA.
- Team of experienced engineers available.

RPS Services & Source handling

- Sources Loaded & Unloaded.
- Nuclear licenced site experience.
- Radiation Classified workers available.
- Security cleared engineers available.
- RPS services available.
